Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a cooling system for an imaging device and a method of controlling said cooling system, classified in class 372, subclass 35.
 - II. Claims 14-17, drawn to a filter with a bypass, classified in class 210, subclass 130.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the cooling system in claim 1 can use different filter which does not required a canister as cited in claim 14. The subcombination has separate utility such as filtering for other cooling system such filtering the fluid of electronic circuit chips, washer fluid, or oil.
